

How to use:

Thank you for taking interest in Zab STORE! Zab STORE is the idea that lead to Zab STORE BIZ which is still being developed.

We hope this packet will help you use Zab STORE if need be!

Zab STORE Installation

First we need to download Zab STORE , if you haven't already. Go to: <http://zabproductions.yolasite.com/programs> and click on the normal Zab STORE link. Then click the download link. Wait for it to finish downloading.

Next we need to extract it. Please ensure you have PeaZip , WinRAR or some other compression software that can extract the files from the .7z file. If you do then double click on the downloaded compression and unzip everything to the desktop.

You should be able to find the folder on your desktop.

Now we must install Zab STORE manually! You can leave the folder on your desktop or you can move it to your [C:\Program Files\](#) location. I would leave it on the desktop. Open the folder and right click on the program with the S icon  And click on the create shortcut icon. Then drag That Icon onto the desktop!

Congratulations! You have just installed Zab STORE.

Running Zab STORE

Next we want to run Zab STORE and see that it works properly. You do not need to restart your computer. Double click on the Zab STORE shortcut and it should start shortly afterwards.

Missing .dll error: If you are getting a missing .dll error [click here](#) to download the .dll.

If it works properly the first time you run it , Wonderful!

Please move onto the next page to learn about the Zab STORE interface.

How to use Zab STORE

Once you open Zab STORE you will see this:

187
416

The menu.

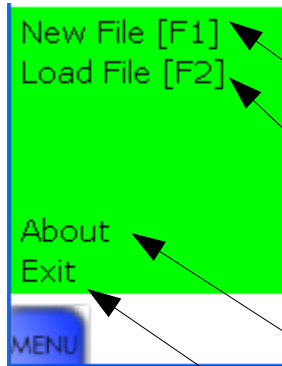

The search bar , type the name of a file and if it exists it will say so

If the file your searching for in the search bar is there it will say so here.

No File

Very simple and clean interface

Outlining the Zab STORE menu

When you click on the menu button a green box will appear. This is the menu.

Creates a new file under the name you specify

Will load a file using the windows explorer instead of the search bar.

Tells you about the program

Exits out of Zab STORE

The menu is quite simple and shouldn't be much of a problem!

Next you will learn how to make your own file and edit it!

Making your own file!

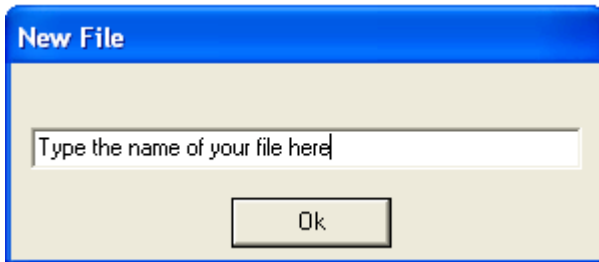

You can create a new file two different ways:

Press F1

Or

Click on the menu button and click on the new file text.

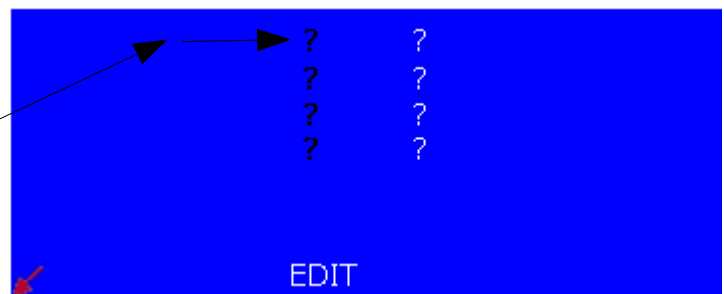

Now a input box should appear. Type out a name for your file (and remember it!).

Once you have done that click OK or press enter.

Now the screen should return to normal. Type in the name of your file in the search bar and if the text in the lower right-hand corner turns green press shift to open your file.

This blue edit box should appear. **It will not look exactly the same.** The red arrow gets rid of the edit window. To edit the information click to the left or right

Click here and you will edit the first ?

Once you edit the information and click OK it will automatically save. So making your own file and editing it is as simple as that with Zab STORE!

Thank you for downloading the manual , at least someone reads these
